

## Imaging protocol - PACYFIC study -

### Protocol for MRI/MRCP of pancreatic cysts:

- T1-weighted axial gradient echo sequence
- T2-weighted axial and coronal sequence (TSE)
- 2-dimensional and 3-dimensional MRCP sequence
- T1-weighted axial 3-dimensional gradient-echo (before and after intravenous administration of Gadolinium)

### Parameters to be scored in the imaging report;

Parameter	Answer
<b>Imaging modality used</b>	- MRI/MRCP - CT - EUS - EUS with FNA
<b>Date of investigation</b>	- .....(mm/yyyy)
<b>Number of pancreatic cysts</b>	- .....

**Record the following parameters per cyst**

<b>Location</b>	<b>Cyst 1:</b> Head/Neck /Corpus/Tail/?  <b>Cyst 2:</b> Head/Neck/Corpus/Tail/?  <b>Cyst 3:</b> Head/Neck/Corpus/Tail/?  etc.
<b>Cyst size (mm)</b>	<b>Cyst 1:</b> ..... /?  <b>Cyst 2:</b> ...../?  <b>Cyst 3:</b> ..... /?  etc.
<b>Cyst pattern;</b>	<b>Cyst 1:</b> Unilocular/Multilocular/? Microcystic/Macrocystic/?  <b>Cyst 2:</b> Unilocular/Multilocular/? Microcystic/Macrocystic/?  <b>Cyst 3:</b> Unilocular/Multilocular/? Microcystic/Macrocystic/? etc.

<b>Cyst wall &gt; 2 mm</b>	- N/Y/?
<b>Solid components</b>	- N/Y/? - If yes; enhancing N/Y/?
<b>Calcifications</b>	- N/Y/? - if yes; Central /Peripheral /Both /?
<b>PD communication</b>	- N/Y/?

<b>Record the following worrisome features <u>per patient</u></b>	
<b>Parameter</b>	<b>Answer</b>
<b>Main PD dilatation</b>	- N/Y; .....(mm)/?
<b>CBD dilatation</b>	- N/Y/ .....(mm)/?
<b>Caliber change main PD</b>	- N/Y/?
<b>Findings suspect of malignancy</b>	<ul style="list-style-type: none"> <li>- Lymphadenopathy</li> <li>- Liver metastasis</li> <li>- Other, specify ..... .....</li> </ul>
<b>Working diagnosis</b>	..... ..... ..... .....
